KEYSTONE® HARDSCAPES

CST - MID-ATLANTIC REGION CATALOG

WWW.CSTPAVERS.COM

Discover the Difference®

As we move into our 2018 season, we are proud to announce that CST is now producing product under the Keystone Hardscape® brand. Since 1986, Keystone, the first U.S. segmental retaining wall company, has set the worldwide standard for excellence and innovation in the hardscapes industry. We will now manufacture select Keystone retaining wall products, along with our trusted Versa-Lok and Regal Stone lines.

Along with the brand change, we are now able to offer all of our customers access to hardscape products manufactured by all three of our Eastern Region plants. Please note, products which are produced exclusively at certain plants will need to be picked up, or delivered, from that plant. To simplify things, product availability by plant is noted for each product within this catalog. We encourage you to take a full load of these products from the plant to minimize the unit freight cost in the price of the product. Partial loads can be delivered for a full freight charge.

We want to thank you for your continued business and look forward to partnering with you in 2018 and beyond.

Sincerely,
The Keystone Hardscapes Team

SLATE STONE / SIERRA / VERSA-LOK® - VERANDA™ / STANDARD FINISH / BRANDYWINE

“CST was introduced in our area two years ago and in that time it has become our 'go-to' paver. Their retaining wall systems are second-to-none! They offer a nice, yet not overwhelming product line making decisions easier for our clients. The price point is better than most and the quality of the product is too. In our 30 years in business this product is one of the best we have used; it is consistent in color and quality.

We look forward to a long and successful relationship.”

VERSA-LOK® - STANDARD WITH MUNICH™ WALL / WEATHERED™ FINISH / ANTIQUE GREY

"GreenScapes Garden Center & Landscape Company has been serving the Central and Upstate New York area for over 30 years and our goal has always been to give our customers superior products and personal service. Bringing on the CST line of pavers and VERSA-LOK® walls was no different. With an extensive assortment of colors, textures and styles, CST gives us the tools needed to please, and exceed the expectations of not only our residential hardscape customers, but our landscape contractors as well."

GreenScapes Garden Center & Landscape Co.

VERSA-LOK® - MOSAIC® WALL / WEATHERED™ FINISH / ANTIQUE GREY

VERSA-LOK® - SQUARE FOOT™ / WEATHERED™ FINISH / HICKORY BLEND

"There are many reasons why we've succeeded over the last 30 years with CST and their VERSA-LOK® walls. First, the quality of the product is fantastic. Secondly, the price is right. Lastly, CST pavers and VERSA-LOK® walls are designed to be installed easily and quickly, providing a more cost-effective solution. Their House Calls™ program is an example of how they go out of their way for the homeowner, the contractor, and for us, the dealer."

Mark J. Goldberg
Morris Brick Company

FINISHES AVAILABLE:

STANDARD
Traditional machine-molded finish with beveled edges.

ANTIQUED™ TEXTURE
Tumbled finish reminiscent of Old World European charm.

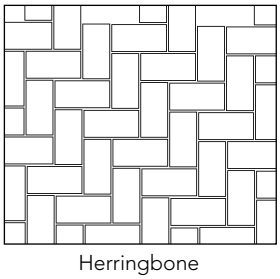
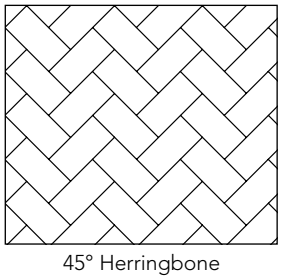
INSTALLATION PATTERNS & DETAIL



Herringbone



45° Herringbone

Why Use a Permeable Paver?

Federal, state and local sustainable site regulations need to reduce the environmental impact of increased run-off from roofs and pavement surfaces. Permeable pavers reduce run-off and pollutants, recharge ground-water and help reduce downstream erosion and flooding.

PRODUCT INFORMATION

PAVERS & WALL STONE
Natural materials are used in the manufacturing of these products and color variations and shadings can be expected. Blended and in some cases solid color may fluctuate in color range from production run to production run. In the case of blended colors, there may be instances of pavers showing more of one blended color and then showing fairly even amounts of blended colors. Color variations and shadings can be expected; therefore CST cannot guarantee color and will not be responsible for any color variations. Please note: when installing multiple pallets, it is imperative to mix the pavers from the different pallets. Doing this will disperse the various color gradations within the installation.

CST's Antiqued™ Texture Finish undergoes a process that is intended to give the pavers the appearance of old world cobble. Within the pallet there will be pavers which may have more tumbled characteristics than others. This may include random surface scratch marks and chipping, along with other distress features. These characteristics are intended and shall not be grounds for material rejection.

CST cannot guarantee the color match of any paver manufactured at a later date from the original order. Therefore, it is recommended that approximately 1% of each paver project built be retained for replacement in case of future damage. Paver heights may vary by ± 2mm. All published sizes of CST's pavers and wall products are nominal and approximate.

EFFLORESCENCE
Efflorescence is a common and natural occurrence. It is a deposit, usually white in color, that may appear on the surface of concrete. It is caused by moisture within the material dissolving natural salts that eventually reach the surface, leaving the salt or a white discoloration on the surface upon evaporation. It is not a manufacturing defect. Although it may present an aesthetic concern, efflorescence does not affect the structural performance of the paver or wall stone and will usually weather away with time. CST does not guarantee against efflorescence and accepts no responsibility or liability for this condition.

POLYMERIC SAND
Polymeric sand is a high-tech mix of graded sand and binder formulated for filling joints between pavers. When using Polymeric sand, it is imperative to follow the manufacturer's directions explicitly. Incorrect application of the Polymeric sand may cause polymeric hazing on the paver surface. CST assumes no liability on the use of Polymeric sand or the resulting discoloration Polymeric sand may cause to the surface of our pavers due to improper application of the material.

SEALING PAVERS
Sealers help resist stain and may enhance the color. As a rule of thumb you should generally wait at least six months to allow any efflorescence to appear. Prior to the application of any sealers, the pavers must be cleaned with an appropriate product to remove dirt and efflorescence. CST assumes no liability on the use of sealers or the resulting discoloration that may result from improper application of the material.

BEFORE - NO SEALER

AFTER - WITH SEALER

ACCESSORIES

NATURAL LOOK SEALER – Water-based penetrating silicone sealer waterproofs and protects concrete, brick, masonry, pavers, and stucco surfaces. Clear sealer does not change the surface appearance. Seals from water, salts, and oils. UV Resistant.

Use For: Driveways • Patios • Walls • Sidewalks • Pre-stress panels • Retaining walls • Tunnels • Loading docks • Bridge columns • Tunnels • Curbs/steps

WET LOOK HIGH GLOSS SEALER – Water-based penetrating silicone sealer waterproofs and enhances the color of concrete, masonry, brick, paver, and natural stone surfaces. Seals from acids, grease, food stains, oil, salt, and more. UV resistant.

Use For: Decorative concrete • Pavers • Natural stone • Exposed aggregate • Brick • Stucco

POLYURETHANE CONSTRUCTION ADHESIVE – A high performance, construction grade adhesive designed for permanently bonding concrete, brick, marble, stone, wood, aluminum, steel, PVC, and tile.

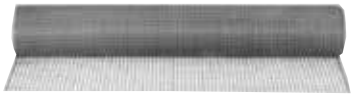
Use For: Repairing broken concrete • Bonding retaining wall block and caps

POLYMERIC SAND - Polymeric Sand is a precise mixture of polymer binders and clean natural sand. Polymeric Sand will bond with the pavers/ stones adding strength to the joint, as well as, reliability to the pavement system. It is ideal for use on any paver surface such as sloping areas, driveways, patios, pool decks, sidewalks, etc. **Available through the Pedricktown plant only.**

Use For: Driveways • Sidewalks • Pool decks • Patios

SRW® PRODUCTS

solid solutions to better hardscapes



5 SERIES & 7 SERIES GRID FROM SRW - Each series meets or exceeds the standards for Geogrids as set by the National Concrete Masonry Association (NCMA). High-tenacity multifilament polyester yarns, which meet the requirements for molecular weight & CEG's as established by the U.S Department of Transportation. Made of 100% virgin resin with NO regrind material with a minimum molecular weight of 25,000 g/mol and a CEG of less than 30. Both series have a high molecular weight.

INSTALLATION TOOLS

KEYSTONE SIMPLE SET®

KEYSTONE SIMPLESET – The Keystone SimpleSET allows for three Keystone Compac or Keystone Standard units to be placed simultaneously; offering a time efficient, cost effective, reliable, and simple to use solution. The SimpleSET unit is extremely valuable for everyday installation accommodating front and back of wall access, as well as tight space conditions. With the SimpleSET you can lift multiple Keystone units with ease and precision.

KEYSTONE KEYLifters

KEYSTONE KEYLIFTER – Designed for lifting and placing Keystone Compac and Keystone Standard units, the Keystone KeyLifter allows two people to easily carry and set a unit by sharing its weight between them. The unique, upward handle design permits the unit to be placed into the wall without injury to hands or fingers. Once the unit is set in place, the KeyLifters can be easily removed from the pin holes for use on the next unit.

(KL03) Series II - Angled pin holes

KEYSTONE® HARDSCAPES

QUIKRETE and its subsidiaries (collectively QUIKRETE) reserve the right to improve its products and make changes to its specification and design without notice. The information contained herein has been compiled by QUIKRETE and to the best of its knowledge, accurately represents Keystone Hardscapes products and how it may be used in the applications which are illustrated. Site conditions, including load pressures acting on the wall, soil types and drainage conditions, may vary. Final determination of the suitability of the product for the use contemplated and the manner of product use are the sole responsibility of the user. Good construction practices and local building codes require the use of an engineered design when constructing retaining walls or free-standing walls in many conditions. Structural design and analysis should be provided by a qualified engineer.
